

# CentOS Linux 8 to CentOS Stream

Step 1: Enable CentOS Stream Repo

```
dnf install centos-release-stream
```

Step 2: Set CentOS Stream repo as the default

```
dnf swap centos-{linux,stream}-repos
```

Step 3: Synchronize installed packages to the latest versions

```
dnf distro-sync
```

When complete, reboot and your CentOS 8 Linux is now CentOS Stream.

Good bye CentOS. I will miss you.
